*Note: An update was made on the lodging units in the 67 municipalities in which 784 units were identified with a total of 23,393 rooms. This update made possible to determine the category, which consists of 1 to 5 stars. As a result, a change was made to the current methodology, which consists in separating visitors who stay in 3-5 star lodging that will be considered as tourists, and those who stay in 1-2 star lodging will be considered as visitors. This change was made in order to have a more accurate number of visitors and the economic distribution they generate in each region.

In July 2023, there was a tourist economic distribution of **\$9,312 MP**.

The passenger is any person transported by any means of transportation (excluding the driver) and who is traveling from one point or location to another.
